

CalendarMaker®

Schools, Clubs,
Churches, Businesses —
All Can Make Colorful,
Presentation-Quality Calendars

Overview:

CalendarMaker is an easy-to-use graphics application used to create presentation-quality calendars in minutes. It's ideal for homes, schools, businesses, churches—wherever a calendar needs to be posted or distributed on a regular basis.

Features:

Extensive Layout Options

CalendarMaker includes more than 50 customizable layouts for anything from a one-day agenda to a one-week travel plan to a one-month activity schedule—all in easy-to-read, eye-pleasing formats.

There are also two-week, two-month and other design options. Calendar sizes can be adjusted from standard 8.5" x 11" to 3" x 3" or up to 113" x 113".

Color, Graphics Add Flair

With CalendarMaker, users can create calendars that display activities and reminders with text and graphics! An extensive set of

graphics tools can be used to add color and icons to any size calendar.

Users can select from CalendarMaker's library of graphics, create icons, or import graphics from other programs. Calendars can be displayed and printed in 256 colors.

Automatically Places Regular Events

To ensure that regular meetings or activities are never missed, CalendarMaker includes "recurring events" which can be set to automatically place regular meetings on the calendar each day, week, or month. For example, if a user regularly attends a particular committee meeting on the second Tuesday of every month, CalendarMaker will automatically insert that in the calendar format. CalendarMaker can even remember holidays and other events.

Multiple Day Events

To signify events such as a trip that takes place over several days, CalendarMaker includes a "floating note" feature. This lets the user

create a graphic block that crosses calendar lines, so that multi-day events can be referenced in a glance.

Finding an Event ...

For people who know they have to attend an event, but can't remember when, CalendarMaker has an easy-to-use "find" function that searches the whole calendar or a range of dates and pinpoints that event.

Works With Leading Printers

CalendarMaker works with Mac™ OS systems and supports today's leading dot matrix, laser and color printers with up to 256 colors in any one file. With CalendarMaker everyone can create presentation-quality calendars in minutes.

System Requirements

- Macintosh® Plus (Classic II or greater recommended)
- System 6.0.5 through OS 9, 2 MB RAM

Import pictures from digital cameras, clip art, the Internet, etc. to add flair to your calendars or to emphasize specific information within the calendar.

Color, color, color. Change background, dates, date headers, put color anywhere you want it for emphasis or fun.

CalendarMaker can automatically insert recurring events.

Add floating notes to your calendars to draw attention to special events or events that last over a number of days.

Let It Snow!

February 2000

CalendarMaker Demo Available At www.pgrsoft.com

It goes on forever. Make calendars for any month. Years into the future or years into the past. CalendarMaker doesn't go out of date after a year!

Display information Sunday-Saturday, Monday-Sunday or Monday-Friday.

Create or import icons and insert them into any day to help communicate who, what, why, where or when.

Use as many typefaces and sizes as you like. Change them from day to day or use them for emphasis.

Also from the Prairie Group:

InTouch^{With...}

Keep track of names, addresses, phone numbers and up to 14 pages of notes on any name or item in your address book. InTouch has no predefined order or entry method so it's easy to learn and easy to use. InTouch will print out as address books/planners, labels or envelopes. Check out InTouch and control your data! (For Mac OS)

DateView

A unique and useful scheduling program for your Mac. View your schedule in multiple formats with a mouse-click. Look at single day, work week, seven-day or five weeks at a time. Looks like and acts like a calendar book with automatic reminders and "snooze alarms." Set recurring events, keep track of everything quickly and easily. (For Mac OS)

In/Out™

You've seen those cute little in/out boards at the front desk? That's exactly the function In/Out performs ... except it does it on your Mac OS network. Check in and out and see who's where from your desktop. No more searching or wondering or wasting time. Try it in your office and you'll wonder how you ran a business without it. (For Mac OS)

DiskTop™

Still the best way to locate, copy, move, delete or rename files. This great Mac OS file management utility is a legend. You'll never lose a file again. You can clean up duplicates, change a file's type or creator and more with DiskTop. (For Mac OS)

QuickConference™

Solves the communication problems businesses face each day within the office. Everyone in your company can discuss important issues and answer questions within minutes, not hours. Best of all, unlike other instant messaging products, QuickConference

can be used by organizations with, or without, a connection to the Internet. (For Mac OS & Windows)
