

In Touch™ With...

An Address Book
And So Much More!

Keeping in touch has never been easier.

InTouch helps you track names, addresses, phone numbers and up to 14 pages of notes on any name or item in your address book. Since InTouch has no predefined order or entry method, your address can take as many lines as you need. And the free-form style of InTouch makes it simple to learn and easy to use. InTouch will also print labels, envelopes, address book/planner pages, and fax cover sheets. InTouch has reminder alarms to help you remember important events and meetings. InTouch will even dial your phone. Once you use InTouch, you will see why it is the best address book and so much more.

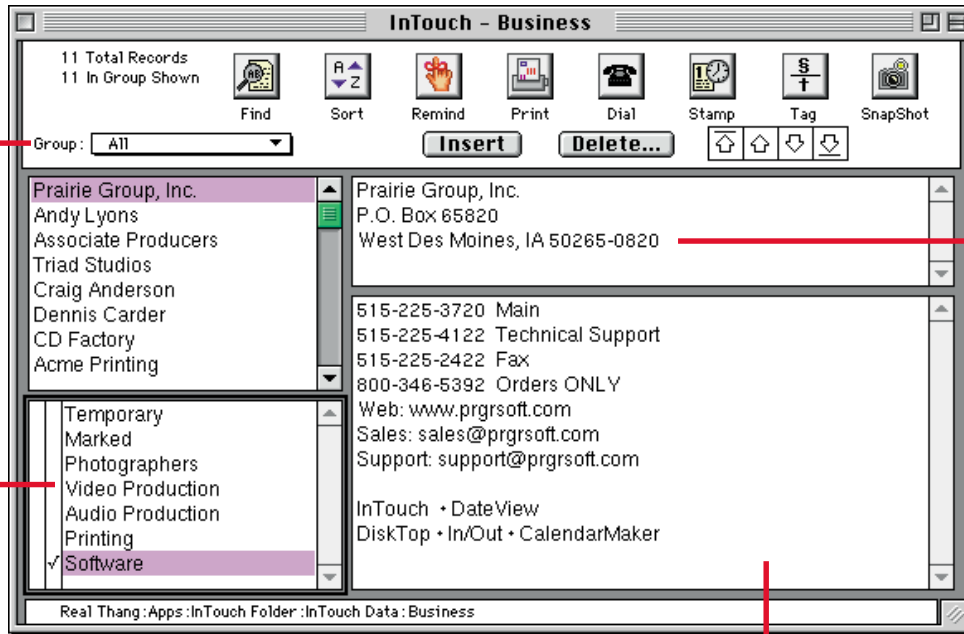

- Create a recipe book by placing recipe name and ingredients in the address field and preparation directions in the notes field. Then you can group recipes by type - meat, pasta, salad, etc.

- Create a quick real estate listing guide by putting the property name and location in the address field and the property description and features in the notes field. Group property by price range, lot sizes, # of bedrooms, # of baths, etc.
- Create a sales guide by listing product names in the top field and features, benefits, most commonly asked questions, and pricing in the bottom field. Group products by price, weight, compatibility, type, etc.
- Create a projects database that lists the project and materials in the top field and step-by-step instructions for completion in the bottom field. Group projects by age group, project type, time to complete, price range, etc.

- Create a collectors guide by listing items collected (baseball player cards, stamp name, coin name and value, etc.) in the top field and description and resale value in the bottom field. Group by classification, value, team, etc.

System Requirements

- Macintosh® Plus (Classic II or greater recommended)
- System 6.0.7 through OS 9, 2 MB RAM
- Hard Drive required

Addresses can take as many lines as you need

"Groups" categorizes your contacts for quicker searching

Detail up to 14 pages of information on any contact or item

Also from the Prairie Group:

DiskTop

Still the best way to locate, copy, move, delete or rename files. This great Mac OS file management utility is a legend. You'll never lose a file again. You can clean up duplicates, change a file's type or creator and more with DiskTop. (For Mac OS)

DateView

A unique and useful scheduling program for your Mac. View your schedule in multiple formats with a mouse-click. Look at single day, work week, seven-day or five weeks at a time. Looks like and acts like a calendar book with automatic reminders and "snooze alarms." Set recurring events, keep track of everything quickly and easily. (For Mac OS)

In/Out

You've seen those cute little in/out boards at the front desk? That's exactly the function In/Out performs ... except it does it on your Mac OS network. Check in and out and see who's where from your desktop. No more searching or wondering or wasting time. Try it in your office and you'll wonder how you ran a business without it. (For Mac OS)

CalendarMaker

Create cool, colorful, informative calendars for any month, any year (past or future). CalendarMaker is the ideal way for business, schools, clubs, churches and more to keep people informed about events and activities. CalendarMaker is an easy-to-use graphics application that can be used to create presentation-quality calendars in minutes. (For Mac OS)

QuickConference

Solves the communication problems businesses face each day within the office. Everyone in your company can discuss important issues and answer questions within minutes, not hours. Best of all, unlike other instant messaging products, QuickConference

can be used by organizations with, or without, a connection to the Internet. (For Mac OS & Windows)
